SORDIN SUPREME

# A step ahead of your prey

A gust of wind in the bushes? Or your prey about to present itself? With a high-end electronic hearing protector, you'll be able to tell the difference. Not only does it protect your hearing, it enhances it – allowing you to locate your prey more accurately and take your shot faster. Sordin Supreme is legendary for its excellent audio quality. The natural ambient sound reproduction, the amplification of the sounds you want to hear, even the rapid restoration to your normal sound image after the shot, allowing you to hear the echo and thus increasing your situational awareness.

AUDIO EXCELLENCE

# The hearing enhancer

While on the move, you want to hear the surrounding sound as naturally as possible – even with your earmuff on. People talking to you, and you responding in a normal voice, without resorting to annoying signaling gestures. And of course, nature's own sound clearly audible to you, as if you weren't wearing a protector at all. But when you're in shooting position, it's a different ballgame altogether. Then you want to pick up even the weakest, subtlest sound from your prey. With Sordin Supreme, you get both these capabilities in one – simply by adjusting the volume depending on the situation.

#### Safe hearing protection

Advanced algorithms are used to manage Sordin Supreme's audio reproduction. Weak sound is amplified to enhance your hearing, while any sound pressure exceeding 82 dB(A) is compressed using digital signal processing. Over 30 years of continuous development have made the Sordin Supreme sound experience unique.

# 82 dB(A)

DIRECTIONAL SENSITIVITY

# Locate your prey faster

The ability to hear weak sound through your earmuff is called ambient sound reproduction. The surrounding audio landscape is picked up by external microphones, digitally processed using electronics, and conveyed to your ears via internal speakers inside each cup. Most electronic hearing protectors have this functionality – only, Sordin does it best. So well, in fact, you can immediately tell the direction and distance to a sound source with an astounding precision. Just think about it, what would it mean to your hit rate if you could identify your prey faster and more accurately?

# HUNTING RADIO INTEGRATION

## Smooth teamwork

Clear and reliable communication is key to safety and hunting success, nothing new there. But did you know that Sordin Supreme supports most popular hunting radio brands out there? Along with your hearing protector comes a 3.5-mm m/m audio cable so that you can easily connect your radio to your Sordin Supreme. Make this legendary hearing protector part of your standard team equipment, and you can all keep your radios in your pockets, while staying in constant contact with your fellow team members – regardless of individual radio brand preference.

It's easy to connect your hunting radio to Sordin Supreme. Just connect the included 3.5-mm m/m cable or your radio's Sordin-compatible cable to the AUX input on the back of the left cup.

PERFECT COMFORT

# A breeze to wear and care for

Just one unprotected shot may be enough to cause hearing loss or tinnitus. And you never know exactly when your shot will come. So, keeping your hearing protector on all day is key, which is why perfect comfort is so important – and so consistently implemented with Sordin Supreme. Not only does your hearing protector fit nicely and stay firmly in place, it is tailored for shooting thanks to its slim cups with rounded edges. And when you're done using it for the day, it folds up neatly due to a foldable headband.

### Firm headband

The sturdy headband makes Sordin Supreme fit firmly on your head. Besides leather, selected models come with a detachable, washable textile headband. (Neckband models are also available.)

### Slim cups

Given their superb attenuation efficiency, Sordin Supreme cups are surprisingly slim in design. Their rounded edges make shooting easy both for right-handed and left-handed shooters.

### High-mounted neckband

The neckband is mounted higher up than normally, which prevents the band from coming into contact with your clothing – keeping the hearing protector firmly in place all day. (Neckband models only.)

### Hygiene kits

Your Sordin Supreme deserves your best treatment. And let's face it, the sealing rings do get a bit messy after some time. No worries, we have replacement hygiene kits including rings and inserts, both for gel and for foam rings.

### Gel rings

Its renowned gel rings make Sordin Supreme super-comfortable to wear – even for eyeglass wearers. They reduce the pressure around the ears, while ensuring optimum noise sealing. (Gel rings come as standard with Pro-X LED models.)

### Ergonomic push buttons

Easy-to-use push buttons make it easy to turn on/off the electronics, and to control the ambient sound or hunting radio or cellphone volume – even when wearing gloves.

EXTREME ROBUSTNESS

# Goes where others don't

Sordin Supreme goes where other don't. It's simply the most robust and reliable hearing protector there is. The cups made of ABS polymer are hard and sturdy, yet never turn brittle even in freezing temperatures. All external metal parts are made of non-corrosive stainless steel or brass. A layer of polymer coating protects the electronics from moisture. We even developed the software ourselves to make sure it will remain free of bugs and corrupt code throughout the hearing protector's life span. The result? Dependability that lasts and a hearing protector that will never fail you.

Let us share an anecdote with you. Once upon a time, at a trade show, we put an open water tank at display in our booth. Next to it, a Sordin Supreme. Let's say we put our honor on the line, there... But even after numerous dips into the tank followed by quick shakes to dry it out, the hearing protector kept on working. Sometimes action does speak louder than words.

## BUILT-IN LED LAMP

# Let there be light

It may seem an insignificant detail at first glance. But once you get used to it, there's no turning back from having a powerful light source always available and ready to use. Just press a keypad combination to activate the built-in LED lamp, which is powered by same batteries as the electronics. No need to wear a headlamp, nor to dig in your pockets to get your flashlight out. This clever feature is available only in our deluxe version, Sordin Supreme Pro-X LED. A must for anyone hunting at latitudes where daylight wanes fast.

Press and hold the - and + buttons simultaneously to switch the LED lamp on and off.

The LED lamp is located at the front of the left cup.

Built-in LED light available

## A FAMILY OF THREE

Sometimes it takes special vocabulary to describe things properly. How else to portray the Sordin Supreme product family? While every member is, by definition, supreme – the attenuation efficiency, sound quality and robustness – some models are simply even “supremes.” Which Sordin Supreme family member are you? Choose between Pro, Pro-X and Pro-X LED. A true, and rare, win-win-win selection!

## Supreme

### Sordin Supreme Pro

There nothing standard about the standard Sordin Supreme model, Pro. It features everything that made this product brand legendary – the natural sound reproduction, the superb directional sensitivity, the rugged design.

## Supremes

### Sordin Supreme Pro-X

Given Sordin Supreme's inherently robust design, the 5-year warranty that comes with Pro-X may almost seem superfluous. But Sordin Supreme users are known to push their product to the limit and if you're one of them, go for Pro-X!

## Supremest

### Sordin Supreme Pro-X LED

Some people always want the best. With Sordin Supreme Pro-X LED, we're indulging them. To date, this is simply the ultimate in hunting hearing protectors with its 5-year warranty and powerful built-in LED lamp.
